

COMMUNICATIONS

Through the kindness of M. Robertson and J. Chadwick it is possible to report a new text from Knossos, found ca. 1913 in the presence of Evans, in the Queen's Megaron at Knossos, and now in University College London. It is to be published in detail by J. Chadwick, but he will perhaps pardon this anticipation of his account of it. It is the left end of a tablet probably to be classed as Dx. The name preserved is ma-ta-u-ro, followed by the broken edge, in which traces of a first sign of a possible ku-[ta-to may be seen or imagined.

Please send requests for the maps of Mycenae mentioned on p. 102 only to Mrs. Wace or to E. L. Bennett. Miss Clay's name was included in error, and we would apologize for the inconvenience caused by this mistake.

Since a library cannot hope to have available copies of all periodicals, nor a Mycenaean Collection offprints of all Mycenaean articles, there are bound to be gaps in the list of materials available. However, the University of Wisconsin Library and Nestor's offices between them can make available all the articles listed in Studies in Mycenaean Inscriptions and Dialect except the following Desiderata:

RAu 1; AnB 1, 2, 4, 7, 8, 10, 11, 12, 16, 17; A1B 1; MBu 1; VB 1; PC 9 (title?); EK 1; ML 24; AL 1; SL 11; IM 1; LP 24; LPr 1; GC 14; JP 1 (title?); MR 10; AS 1; JAS 2; ESc 1; MS 1; DS 1; CS 1; LjS 1; TW 15; JW 4; ZZ 1. If any offprints of these are available to increase the usefulness of our collections, we should be most grateful to receive them.

BIBLIOGRAPHY

Further items in the Knossos controversy:

A notice in Frankfurter Allgemeine Zeitung (signed rjh) 5 July, 1960.

A notice in Time, and another in Newsweek, both 18 July, 1960.

Noticed in Illustrated London News 30 July, 1960 by F. Davis before a review of Kenna, Cretan Seals, etc.
